CAIMI BREVETTI

Made in Italy since 1949

Founded in 1949, Caimi is one of the leading European design-oriented manufacturers of furniture and complements for the office, home and contract sectors. For **over 70 years** Caimi has continued to research and assay new solutions for the betterment of people's lives and living spaces. Thanks to its sophisticated integration of production line work and logistics operations, Caimi can effect extremely fast deliveries of any orders from its product range, which is made up of around **3,000** items and more than **35,000** separate components.

AWARDS

Over **60** international awards

With its products displayed in design museums around the world, Caimi has received dozens of international awards and prizes, including three Compasso d'Oro prizes, three German Design Award, and sixteen ADI Design Index prizes. The full list of prizes and awards is available at www.caimi.com

DESIGNERS

& design

Snowsound acoustic performance takes shape in projects thanks to great designers. Many shapes and colours are designed to be a visible and distinctive part of the project and to discreetly integrate into the spaces. Resolving acoustic problems, from the simplest to the most complex, with a complete range of products based on a totally innovative approach.

OPEN LAB

Research, Academy & Non Profit

Discover Open Lab

Open Lab is an advanced facility housing 7 futuristic laboratories dedicated to theoretical and applied research in technology, acoustics and physics. The purpose of the research facility is to carry out experiments on the behaviour of sound, on the perceptive capacities of humans, and on the effects of sound on people. In keeping with the traditions of our company, which has always been socially aware and has always aspired to solutions that improve the quality of life of all, Open Lab operates as a not-for-profit entity that is placed free of charge at the disposition of universities, research institutes, foundations and public-sector bodies. Open Lab: A laboratory complex whose doors are open to the world; without research, there can be no innovation.

SNOWSOUND SOFTWARE

Your acoustic projects with Snowsound

Psychophysical wellbeing is an essential factor influencing architectural choices and the spaces we live in. Design is increasingly combining aesthetic and sensorial aspects, shifting the focus towards **integrated solutions** that allow aesthetics and comfort to coexist.

Caimi developed **two acoustic design software** that are offered to customers completely free of charge, applicable to both new or existing environments. The precision of the software is proven by more than **100,000 acoustic calculations** made over the years, by the **2 international awards** received and by the new research laboratory **Open Lab** that allows to develop increasingly advanced research.

Functionality Funzionalità	Acoustic calculation Calcolo acustico	Acoustic analysis Analisi acustica
Estimation of sound absorption material required Stima del materiale fonoassorbente necessario	✓	✓
Possibility of combining different products and technologies Possibilità di combinare più prodotti e tecnologie	-	✓
Graph with pre- and post-intervention reverberation curves Grafico con curva di riverberazione pre/post intervento	-	✓
Graph with dB reduction Grafico con abbattimento in dB	-	✓
STI index calculation Calcolo indice STI	-	✓
Rw index calculation Calcolo indice Rw	✓	✓

Discover our
software

ACOUSTIC ANALYSIS

CAIMI's Acoustic Analysis software is a professional tool that accurately estimates reverberation time curves before and after installing different SNOWSOUND products, eventually combining them together. The software also predicts the speech intelligibility index (**STI**) and reduction of sound pressure levels in **dB** within any given space. In case of curtains made with Snowsound Fiber Acoustic Textiles, the software calculates the **R_w** value, which determines the effectiveness of the specific configuration as a noise insulator.

ACOUSTIC CALCULATION

The Acoustic Analysis software is a **quick and easy way** to calculate the ideal amount of Snowsound sound-absorbing products. Only three needed data: room size, use, and the CAIMI product of choice.

The monitor displays a form with four input fields, each with a label in bold and its Italian translation below it. The values entered are 50 m², 3 m, 150 m³, and Office.

Surface of the floor Superficie del pavimento	50 m ²
Room height Altezza della stanza	3 m
Total volume Volume totale	150 m ³
Intended use Destinazione d'uso	Office

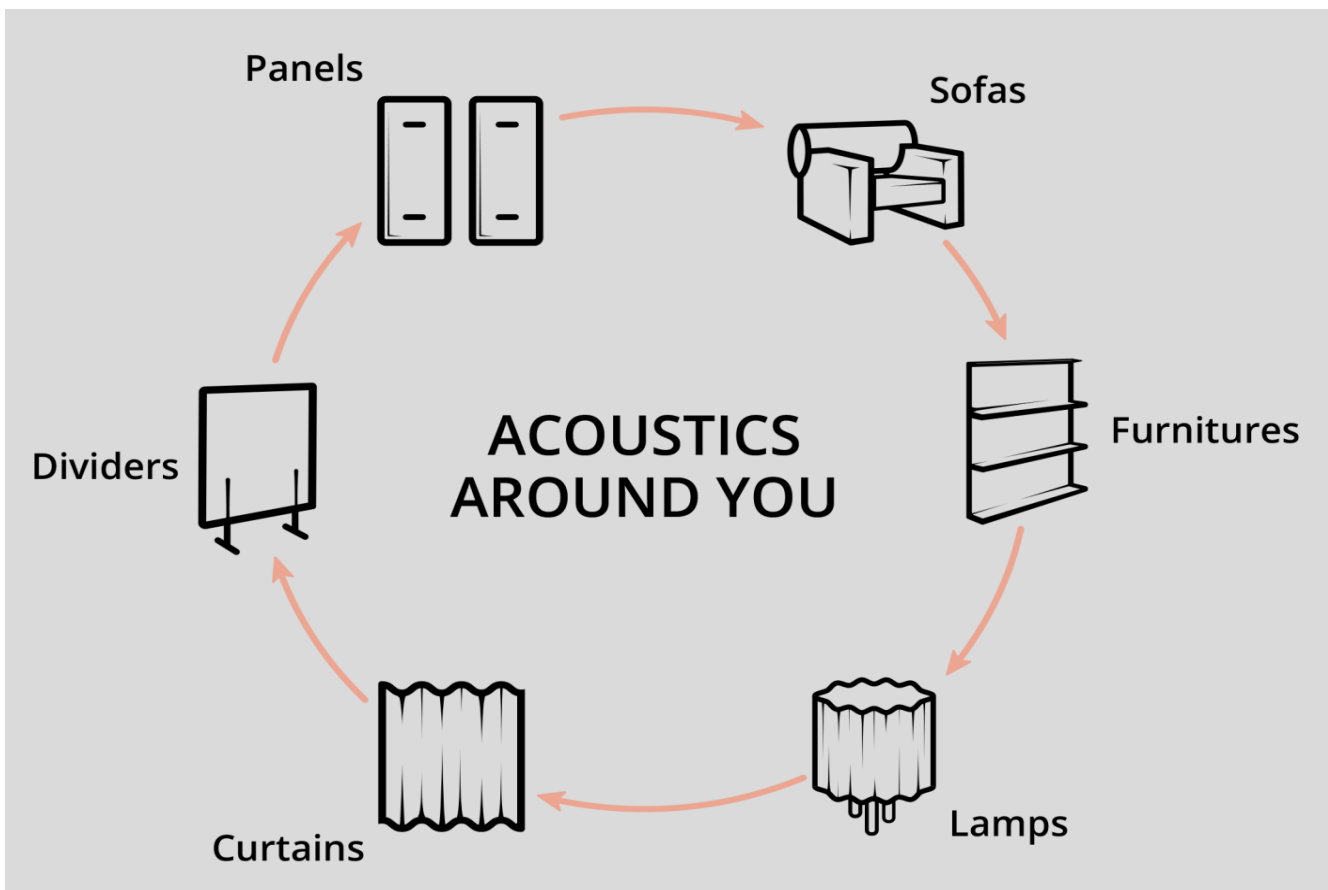

SELECT AND MIX THE PRODUCTS

Our software calculates your acoustic solution

Watch
the video

Not just sound-absorbing panels, but complete systems that include lighting, fabrics, curtains and furnishings. With SNOWSOUND, the acoustic design incorporates aesthetic and functional needs for any environment. Our calculation software combines all the products in the SNOWSOUND catalogue and it performs an acoustic calculation based on precise tests carried out on each individual product. The customer simply has to choose the desired products while the calculation software takes care of the acoustic analysis and it estimates the required quantities.

WELLBEING TECHNOLOGIES

Acoustic comfort

Electromagnetic reduction

Air purification

Caimi's technologies (acoustic comfort, radio frequency reduction and passive air purification) are designed to significantly improve people's wellbeing.

A + E TECHNOLOGY

Acoustic + Electromagnetic Reduction

Metallized high-tech polymer fabric with pure silver for radio frequency reduction. Specifically designed to reduce the power of electromagnetic fields. However, it doesn't completely obstruct signals, allowing the use of smartphones and Wi-Fi networks. This radio frequency reducing fabric can be included inside sofas and other sound absorbing elements, combining sound absorption with reduction of electromagnetic fields. A new patented technology for the wellbeing of people.

Description

7M2320-GR

Set for fixing to a glass or masonry vertical surface, of 1 Mitesco panel.

Set composed of:

4 magnets **(A)** / 4 steel and high-tech polymer plates **(B)** / 4 plates with double-sided adhesive tape **(C)**.

(1) For glass surfaces use the suitable plates with double sided adhesive tape **(C)**.

(2) For masonry surfaces fix directly the plates **(B)** with screws (not included).

Description

7LGH16-BO

Suspended lighting fixture with 1 LED light with 10W output, 3000K. Light fixture made of painted aluminium, with a length-adjustable power cable (max. extension 390 cm) The recessed light sources offer optimal visual comfort. For codes 7GF120-XXX - 7GOF-XXX.

Code

7LGH10-N

Description

Suspended lighting fixture with 25W LED source, 3000K. Steel structure with height-adjustable cable. The special satin finish of the polyethylene diffuser enables the homogeneous emission of light. Power cable L. 390 cm. For codes 7GF120-XXX - 7GOF-XXX.

AIR PURIFICATION TECHNOLOGY

The lamp heats the air in the upper part, generating a convective motion. The heated air passes through a filter made of galvanized aluminum mesh, treated with silver ions, purifying itself.

1 Air purification filter

2 LED element

3 Air flow

Code	Colour	Description
1803-BBO	White	Suspension led lamp 6,2W - 3000K equipped in the upper part of the lampshade with a filter containing silver ions for air purification.
1803-RBO	Red	

Code	Colour	Description
1804-BO	White	Aluminum suspension led lamp 17,3W - 3000K equipped in the upper part of the lampshade with a filter containing silver ions for air purification.

Code

Description

7KL3-801

Sound-absorbing element consisting of 2 overlapping layers of **Snowsound-Fiber 8 Bouclé** polyester sound-absorbing fabric. The three-dimensional effect of the outer layer is obtained through the “pleats” in the fabric that are held in place by stainless steel clips in a pattern that is repeated in each modular.

TECHNICAL INFORMATION:

- Curtains made from Snowsound Fiber sound-absorbing fabrics, custom-made according to specific customer requirements.
- The curtain is always fixed to a ceiling rail.
- The curtain opens and closes by manual traction.
- Due to the handcrafted manufacture of Snowcurtains, the minimum tolerance of the curtains is approximately 1 cm in both width and height.
- White ceiling track included in the price and always supplied in the width of the curtain.
- Standard dimensions available Width 70 cm to 560 cm / Height 120 cm to 400 cm. **For dimensions and finishings non included in this price list, please contact our sales department.**

SALES CONDITIONS:

- Due to the handcrafted manufacture of Snowcurtains, an advance payment of 50% of the value is required at the time of order.

GENERAL TERMS OF SALE

1. This price list cancels and replaces the previous ones and is not a proposal.
2. The product prices may be changed by the vendor at any moment without prior notice; all prices are not inclusive of assembly or installation.
3. The vendor reserves the right to alter the construction materials, the technical and visual characteristics and also the dimensions of the products, at its own unquestionable discretion and without any prior notice.
4. The images of the products contained in the photographic catalogue are purely indicative.
5. In addition to the specific terms agreed each time, sale is governed by these general terms, which are considered to be known by the purchaser; any clauses deviating from these general terms of sale must be in writing.
6. The purchaser's purchase proposals and/or orders are conditional upon the vendor expressly accepting or starting fulfilment of the agreement, in cases where this is permitted. Any subsequent amendment to the sales agreement will not be valid and binding unless entered in a written document signed by the party being asked to accept this amendment.
7. Delivery of the goods sold is with remittance thereon to the carrier or forwarder, so that the goods travel at the purchaser's risk and danger; this also applies in cases where the goods are sold free to the purchaser's address. Any other request, complaint and/or action relating to shipment or transport of the goods must be brought by the purchaser directly against the forwarder or the carrier. Any damage, loss or breakage of the goods sold which is attributable to shipment or transport thereof will not exempt the purchaser from liability for payment of the agreed price.
8. The delivery time is indicative and not binding; it may be delayed without any obligation of indemnity or compensation of any direct or consequential damages suffered by the purchaser as a result of late delivery and without this leading to termination of the sales agreement due to the vendor's non-fulfilment. In no circumstance shall Laine be liable for any consequential damages suffered by the customer for late delivery.
9. With the exception of cases of force majeure, in the case of strikes and all other cases which temporarily prevent the vendor from fulfilling the sales agreement properly, the vendor is entitled to withdraw from the agreement, without the purchaser being entitled to claim any damages, except for the repayment in the case of withdrawal, of any amount paid as an advance.
10. Payment of the sale price of the products must be made at the vendor's registered office. In the case of late payment, the purchaser will automatically be placed in arrears and will be required to pay interest in the amount and from the time required. Payment terms: Strictly Net 30 days. An indemnity is required for all commercial credit facilities. Accounts are payable within 30 days from statement date. We reserve the right to withhold supply supplies on overdue accounts. Laine may commence legal proceedings to recover outstanding monies: all costs incurred will be added to the debt and payable by the purchaser/client.
11. The vendor is not liable for any defects of the products known or knowable to the purchaser, who has not immediately refused to accept delivery of the goods. Disputes or complaints over the product quantities must be notified upon delivery, with noting on the relative transport document. Replacement of the product does not signify acceptance of the claim or complaint. The purchaser will only be credited the amount after the faulty products have been returned and provided that the vendor's liability has been recognised or otherwise ascertained and limited to the purchase price of the items only.
12. The drawings, models, graphs and other technical information on the products being sold, and also samples, catalogues, photographs and similar materials, always remain the intellectual property of the vendor and may not be copied, or transmitted to others, or used in any other way.
13. The amounts paid by way of a deposit may be withheld by the vendor if the order is cancelled and/or in all other cases of non-fulfilment by the purchaser which justifies the vendor's withdrawal, without prejudice to the right to request fulfilment of the agreement and also the right to demand compensation of greater damages. In contrast, if the purchaser fulfils its contractual obligations, the amounts paid by way of deposit will be allocated to payment of the price; said amounts, and all other advances, will be non-interest-bearing.
14. Any tolerance by one of the parties of the other's conduct which breaches the clauses governing sale does not constitute waiving of the rights deriving from the breached clauses nor the right to demand precise fulfilment of all the terms and conditions contained in the sales agreement.
15. The vendor maintains ownership of the products until complete payment of the price indicated on the invoice. Up until that date, the products delivered are considered as only held in deposit by the purchaser. The latter therefore accepts the risk of damages to the products deposited attributable to any cause.
16. The purchaser is responsible in ascertaining that the products are "fit for purpose". The vendor declines all liability consequent upon items not being suitable for application.
17. The purchaser is required to inform its own customers and/or final users of the product characteristics, in order to reduce to a minimum the risk of improper use which could expose the vendor to possible claims of damage. In the case of failure to provide this prior information, the purchaser expressly exempts the vendor from any hypothetical liability.
18. Victoria, Australian Court will be the sole court of competent jurisdiction for all disputes which may arise in relation to sale and any actions of amendment and enforcement thereof, including those relating to the validity, effectiveness, interpretation, fulfilment and termination of the agreement.
19. Orders placed on Laine Furnishings Pty Ltd for the Snowsound range of products cannot be cancelled.
20. Payment terms: Strictly Net 30 days. An indemnity is required for all commercial credit facilities. Accounts are payable within 30 days from statement date. We reserve the right to withhold supply supplies on overdue accounts. Laine may commence legal proceedings to recover outstanding monies: all costs incurred will be added to the debt and payable by the purchaser/client.
21. Ruling price is price at which goods are invoiced. Prices to change without notice. Prices are exclusive of GST. A 10% value will be added to all orders.
22. Freight will be added to all orders. A \$20 per \$1000 order value or part thereof will be added to Victorian orders and a \$35 per \$1000 order value or part thereof will be added for all other states. Minimum delivery charge \$20 Victoria and \$35 all other states. All prices exclude GST.
23. Claims will only be considered if product is returned to Laine Head Office at customers expense within 7 days of receipt and product is in the same condition and packaging as it left the Laine warehouse.
24. Colour variation is a natural accepted part of the textile industry. Laine will endeavour to match colours as closely as possible within commercial tolerance. Laine will not be responsible for products exposed to direct or indirect sunlight / UV light.
25. In any case, before purchasing the products, it is necessary to consult the terms of sale, technical characteristics and the following:
26. The purchaser is required to inform its own customers and/or final users of the product characteristics, in order to reduce to a minimum the risk of improper use which could expose the vendor to possible claims of damage. In the case of failure to provide this prior information, the purchaser expressly exempts the vendor from any hypothetical liability.
27. The seller guarantees the conformity of products to the specifications indicated in the order confirmation, except for tolerances considered acceptable in industrial production.
28. The seller does not guarantee the suitability of the products for particular purposes and/or special uses, unless specifically requested by the buyer and expressly accepted in writing by the seller with a statement in the relative order confirmation; the buyer must ensure that any specific standards and/or legal requirements are specified in the relative order confirmation of the seller.
29. The seller's information regarding specific suitability of the products is purely indicative.
30. Any eventual consulting and/or design activity and/or calculation carried out by the seller pertaining products is to be considered purely indicative and represents a simple suggestion concerning products' generic positioning, hence not binding. Each suggested fact must be fully verified by the buyer; the seller assumes no responsibility for the results of such activities.
31. Since the applications of the products made by the buyer are beyond the seller's control, the seller is not responsible for the actual use of the products; the seller is not responsible for any damage and/or loss resulting from incorrect or unusual application of the products.
32. In case of orders containing non-standard products and/or colors, the buyer must purchase the entire production carried out specifically for this purpose.
33. In any case, before purchasing the products, it is necessary to consult the terms of sale, technical characteristics and furthermore the following:

WARNINGS

- Before installing the products, check the bearing capacity of the wall/floor/surface on which they will be positioned, ensuring they are suitable for the intended type of user/use.
- The products are not suitable for use by children.
- The products are not suitable for use outside.
- If the products are applied to the wall/floor/surface, they must be installed with anchoring devices (not shown in the catalogue).
- The products must be assembled and/or installed exclusively by skilled technical personnel, using instruments and tools appropriate for this purpose.
- Carefully read the instructions enclosed with the product before proceeding with assembly and installation, paying particular attention to the warnings and to the explanatory drawings; if the instructions are not attached, contact the vendor's technical office.
- Suitable attachment devices must be used to attach the products to the wall/floor/surfaces, which are strong enough to resist the forces generated; in any case, suitable supporting elements to support each individual element must be used.
- In the case of incorrect installation and/or weights exceeding the maximum loads indicated on this price list and/or the instructions attached to the individual products, a situation of danger could be created, the products could collapse, fall and cause damage to people and/or things: never exceed the loads indicated.
- Do not install the product in the case of any doubts over the methods of installation and/or bearing capacity of the wall/floor/surface on which the product is to be positioned.
- Comply with the instructions and compositions shown on this price list; for different compositions and/or further information on the products or installation methods, contact the vendor's technical office.
- Slight color differences between one lot and another have to be considered normal, within usual tolerances usually accepted for industrial productions.
